

**Pre-reading and early math skills in 26 action-packed activities.**

Students explore letters and sounds, build sight word vocabularies, understand number concepts, learn about shapes, colors, and position.

Activities encourage critical thinking and include at least one curriculum area, including language arts, mathematics, science, social studies, music, and movement.

Single user, Lab Packs, and School Unlimited versions also available. Call (800) 321-7511 for details.

**Interactive Science Series for Young Children Based on National Science Standards Cross-Curricular Approach to Science**

Nine colorful fact-filled modules teach introductory concepts in physical, earth, and life sciences. A reoccurring character, Professor Lab Coat, provides direction through the series. Each module uses a virtual book in a nonfiction leveled reader format to present information. Learning is achieved through cross-curricular activities that include sorting, sequencing, writing, and short quizzes to develop science concepts and reading skills.

Compatible with MAC 10.6 and Windows XP/Vista

- Compliments All Science Programs
