

# Tenth Planet<sup>®</sup>

Systematic Approach to Language Arts and Math Instruction

## Language Arts and Math Curriculum for skill development and application

**\$699<sup>95</sup>**

Single Title Network

Grades PreK-3

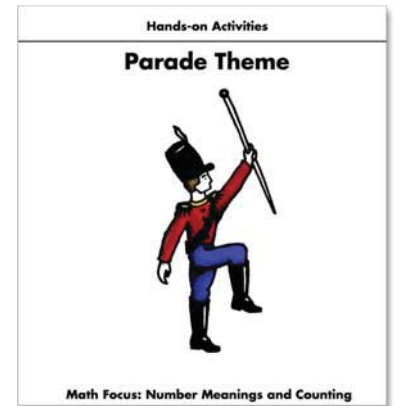

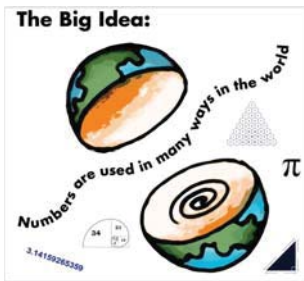

### Titles featured in series include:

- Consonant Blends and Digraphs
- Letter Sounds
- Roots, Suffixes, Prefixes
- Vowel Patterns
- Vowels: Short and Long
- Word Parts

The Tenth Planet<sup>®</sup> Literacy Series focuses on developing students' word-building and phonemic awareness skills, this series starts with an introduction to letter-sound relationships. Students discover patterns of letters and sounds, and finally work with larger units of meaning – manipulating and applying morphemes.

The Tenth Planet<sup>®</sup> Math Series helps students develop understanding of number meaning and uses, explore part-whole number relationships, groupings on numbers and fraction operations. This helps students build a foundation for later mathematical skills.

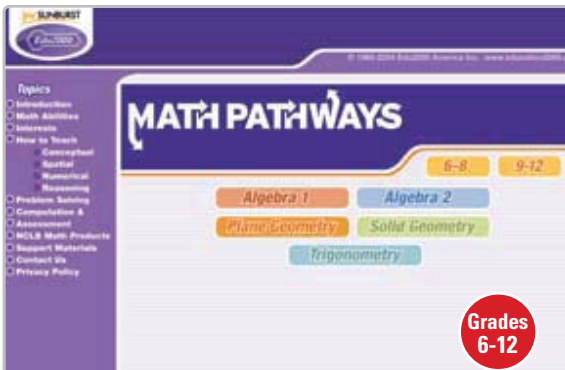

Compatible with Windows 7

# MATH PATHWAYS

Simple Learning Approaches to 6-12 Math

Math Pathways is a standards-based middle and high school (6-12) mathematics solution that includes interactive content on every subject of math, enabling instructors to use numerous teaching methodologies (or pathways) to illustrate math concepts. The programs include content linked to major math textbooks, assessment exercises, video and audio real world examples, quizzes and tests, animation, a mathematical dictionary and even virtual reality to illustrate these key math concepts and lessons.

Grades 6-12
